Course Planner for the School of Computer Science and Engineering

Author: Anne-Gaelle Colom, date: 27/03/26

Updated for the Spring 2026 Module Fair: This reflects the modules available in the 2026/27 academic year.

The **Course Planner** helps you:

- View module descriptions and when they run
- Plan your course structure
- Receive an email with module details for offline review

⚠️ **Important:** The Course Planner is for information only. You must still register your choices on SRS/SITS.

How do I access the Course Planner?

Important note: You will need to access the Course Planner from the University Network or via the VPN (use GlobalProtect and connect to remote2.westminster.ac.uk)

You can access the app using the following link:
https://coloma.users.ecs.westminster.ac.uk/mobileAppInnov/moduleFair.html

Or the following short link:
https://bit.ly/moduleFair

Or the QR Code:

How do I use the Course Planner?

Step 1: Select your course

Step 2: View your course structure, check module descriptions and assessment patterns, add your chosen modules until you have reached the correct number of credits

You will see whether the module runs in semester 1, semester 2 or id year long. This is indicated on the left hand-side of the module on a small screen or by the physical location of the module block on a large screen.
To see the module details, swipe left on the module and press the "…"
To add an optional module to your selection, swipe left on the module and click "+"
To remove an optional modules from your selection, swipe left on the module and click "-"
For a quick view of the module assessment pattern, swipe right on the module.

Step 3: To receive an email with your chosen modules, scroll all the way down, enter your email address and press the submit button.

This is how the application looks on a mobile device:
